PROFESSIONAL SUMMARY

Computer Engineering student specializing in Information Systems, with projects in applied AI, data integration, decision support, and systems analysis. Seeking an internship in applied AI, AI consulting, or business transformation, remote across Portugal or hybrid/on-site in Coimbra.

SELECTED PROJECTS

Industrial Motor Fault Diagnosis | MATLAB, CBR, Neural Networks
Compared case-based reasoning and feedforward neural networks to classify normal, electrical-fault, and mechanical-fault cases using 5,000 records and 14 attributes; prepared the data and evaluated weighted-Euclidean case retrieval.

HikeFlora | Plant Classification App | Python, TensorFlow, MLP, CNN
Compared MLP and CNN architectures for five plant species, optimized the final model, and implemented a functional application that classifies a plant from a photo.

Information Systems II | Data Warehousing and ML | Python, MySQL, SQL Server, ETL
Built a star-schema data mart for food-waste and cost analysis, integrating MySQL and CSV with Python ETL, indicators, and dashboards; also researched ML use cases and tools in Data Warehouse architectures.

MyHotels | Booking and Accommodation Management | C# 12, ASP.NET Core 8, Blazor, EF Core, SQL Server
Developed an academic proof of concept with a public booking frontend, a management application, and a REST API, implementing business rules, user roles, authentication, and shared data persistence.

Public Space | Requirements and UML Modelling | Systems Analysis
Translated domain problems into solution models and technical documentation, including a domain model, use cases, system sequence diagrams, and activity diagrams.

TECHNICAL SKILLS

Applied AI and machine learning: CBR, feedforward neural networks, MLP, CNN, image classification, data preparation, model optimization and evaluation.
Data and business intelligence: Python, SQL, PL/SQL, MySQL, SQL Server, Oracle, ETL, dimensional modelling, Power BI.
Software and systems: C, C++, C#, MATLAB, ASP.NET Core, Blazor, Entity Framework Core, REST APIs, HTML/CSS, TensorFlow, Git; requirements analysis and UML.
Productivity and soft skills: Microsoft Office (Word, Excel, PowerPoint); analytical thinking, problem-solving, teamwork, communication, adaptability.

EDUCATION

Bachelor's Degree in Computer Engineering, Information Systems | 2023–Present
Instituto Superior de Engenharia de Coimbra

CERTIFICATIONS AND LANGUAGES

MathWorks: MATLAB Onramp (Feb 2025); Solving Ordinary Differential Equations (Mar 2025).
Languages: Portuguese and English
