PROFESSIONAL SUMMARY

Computer Engineering student (Information Systems) with project experience in applied AI, data analysis, and requirements modeling. Seeking an internship connecting AI and business, remote in Portugal or hybrid/on-site in Coimbra.

PROJECT EXPERIENCE

Industrial Motor Fault Diagnosis | MATLAB, CBR, Neural Networks
Compared CBR and neural networks for fault diagnosis using 5,000 records and 14 attributes; prepared data and tested weighted Euclidean retrieval.

HikeFlora | Plant Image Classification | Python, TensorFlow, MLP/CNN
Compared MLP and CNN configurations, including dropout and augmentation, to classify five plant species.

Public Space | Requirements and UML Modeling
Translated system needs into UML domain, use-case, sequence, and activity diagrams.

Multi-Agent Resource Simulation | NetLogo
Simulated explorer and collector agents; compared communication and resource allocation across runs.

Flight Ticketing Database | Oracle SQL, PL/SQL
Created queries, procedures, and triggers for ticket distribution, overbooking checks, and cancellations.

TECHNICAL SKILLS

Applied AI and data: CBR, feedforward neural networks, MLP, CNN, classification, data preparation, feature scaling, model comparison and evaluation.

Business and systems analysis: problem framing, requirements analysis, UML, domain modeling, use cases, system and activity diagrams, information systems.

Programming, data, and productivity tools: Python, C, C++, MATLAB, SQL/PLSQL, HTML, CSS, TensorFlow, Oracle, NetLogo, Git, Power BI, Microsoft Office (Word, Excel, PowerPoint).

Soft skills: Analytical thinking, problem-solving, teamwork, communication, adaptability.

EDUCATION

Bachelor's Degree in Computer Engineering, Information Systems | 2023 - Present
Instituto Superior de Engenharia de Coimbra

CERTIFICATIONS AND LANGUAGES

MathWorks: MATLAB Onramp (Feb 2025); Solving Ordinary Differential Equations (Mar 2025)

Languages: Portuguese and English
