PROFESSIONAL SUMMARY

Final-year Computer Engineering student specializing in Information Systems, with project experience in applied AI, data integration, decision support, and systems analysis. Seeking an internship in applied AI, AI consulting, or business transformation, either remote in Portugal or hybrid/on-site in Coimbra.

PROJECT EXPERIENCE

Industrial Motor Fault Diagnosis | MATLAB, CBR, Neural Networks
Compared case-based reasoning and feedforward neural networks to classify normal motors or those with electrical/mechanical faults (5,000 records, 14 attributes); prepared the data and evaluated retrieval using weighted Euclidean distance.

HikeFlora | Plant Classification | Python, TensorFlow, MLP, CNN
Compared MLP and CNN models to classify five species, optimized the final model, and created an application that classifies plants from photos.

Information Systems II | Data Warehousing and ML | Python, MySQL, SQL Server, ETL
Implemented a star-schema data mart to analyze food waste and costs, integrating MySQL and CSV data via Python ETL, with metrics and dashboards; explored ML scenarios and tools in data warehouses.

MyHotels | Accommodation Booking and Management | C# 12, ASP.NET Core 8, Blazor, EF Core, SQL Server
Developed a proof of concept with booking, management, and REST API components; implemented business rules, user roles, authentication, and a shared database.

Public Space | Requirements and UML | Systems Analysis
Modeled the domain and documented the solution with use cases, sequence diagrams, and activity diagrams.

TECHNICAL SKILLS

AI and Machine Learning: CBR, neural networks (MLP, CNN), image classification, data preparation, optimization, model evaluation, TensorFlow.

Data and BI: Python, SQL, PL/SQL, MySQL, SQL Server, Oracle, ETL, dimensional modeling, Power BI.

Development: C, C++, C#, MATLAB, REST APIs, HTML/CSS, Git, requirements analysis, UML.

Tools and Skills: Microsoft Office, analytical thinking, problem-solving, teamwork, communication, adaptability.

EDUCATION

B.S. in Computer Engineering | Information Systems | Senior Year
Instituto Superior de Engenharia de Coimbra

CERTIFICATIONS AND LANGUAGES

MathWorks: MATLAB Onramp (2025); Ordinary Differential Equations (2025)
Languages: Portuguese and English
